

# Workflow for Everyone

Build complex workflow processes in SharePoint, quickly and easily.  
Connect SharePoint to Enterprise Systems.

Empower users across your organization to:

- ✔ Automate business processes,
- ✔ Automate common SharePoint administrative tasks,
- ✔ See real-time feedback of workflow activities,
- ✔ Generate rich enterprise-level reporting,
- ✔ Create workflows in hours not days,
- ✔ Draw it, not code it.

Extend MOSS with advanced workflow capabilities all within a web-based GUI embedded within SharePoint.

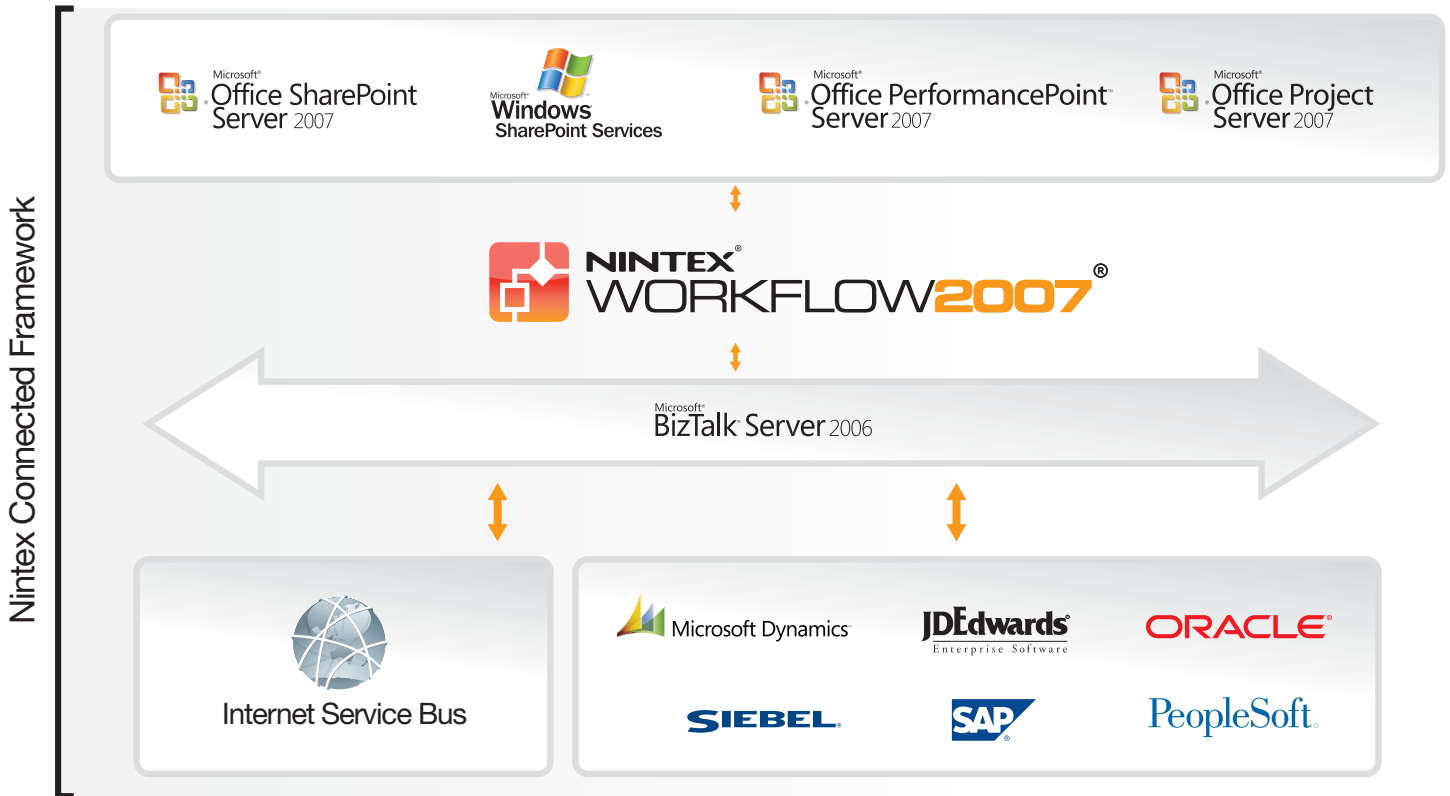

Exclusive LazyApproval™ System, approve or decline in real language, even when mobile.

# 500+ Customers in 35 Countries

"Nintex Workflow 2007 allows business users to harness the power of Windows Workflow Foundation 2007 without specialist skills. My favourite feature is "LazyApproval" where a person can approve work items via email."

Angus Logan - Technology Specialist (Office Platform), Microsoft

## Graphical Web Interface

- Browser based client (no desktop software required)
- Easy to use drag and drop workflow designer
- Visual workflow progress

## Advanced Workflow Features

- Delegation and escalation capability
- Scheduled and timed workflows
- Rich Notification via E-mail, Instant Messenger and SMS
- Rapid approval through Nintex LazyApproval™
- Predefined templates for common processes

## Built for SharePoint

- Deep integration with MOSS 2007/WSS3.0
- Automate common SharePoint tasks
- Built on Windows Workflow Foundation (WF)

## Enterprise Integration (Enterprise Edition\*)

- Integrate SharePoint with Non SharePoint Systems
